DRUKCASE × TirgumAI

A partnership for Bible publishers

PRINTING A BIBLE

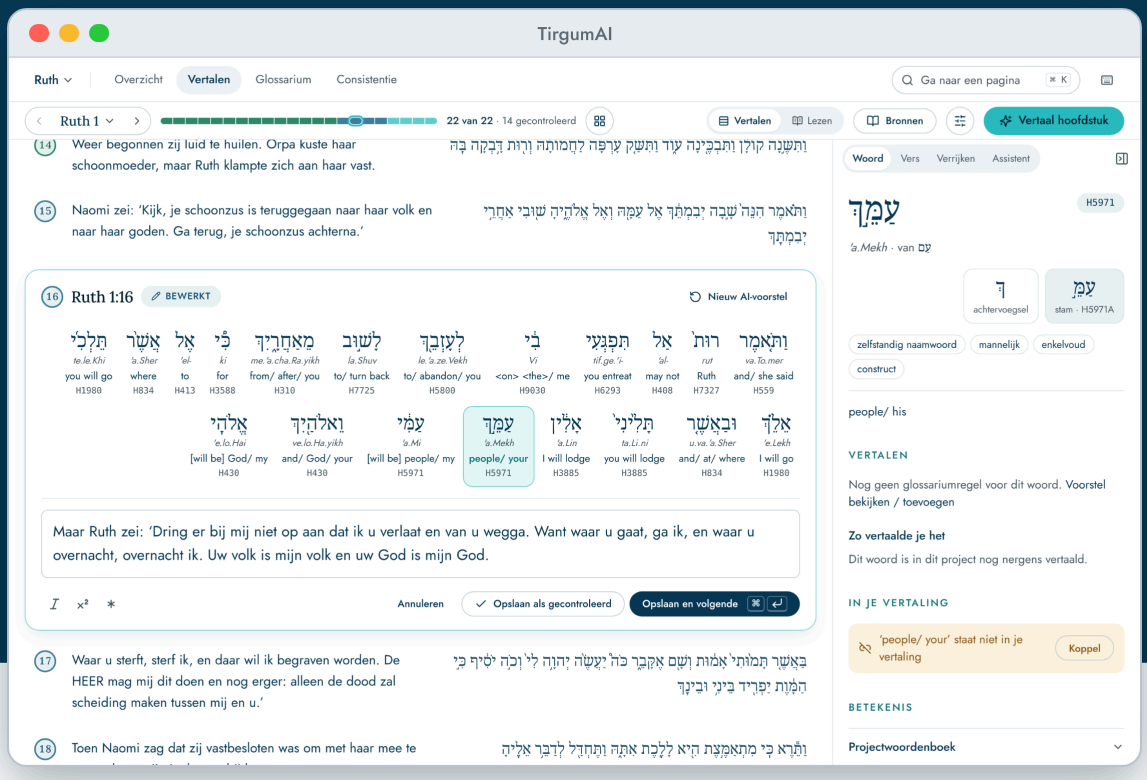

From text to print-ready Bible, without months of typesetting

Drukcase is TirgumAI's first print production partner to use the software for automated Bible typesetting. It has produced a complete Bulgarian New Testament, and further editions are in preparation.

ABOUT TIRGUMAI

A new generation of Bible software

TirgumAI helps translators produce Bible translations with the support of AI, verse by verse from the Hebrew and Greek source texts. The same software also typesets **complete Bibles and study Bibles** and provides an online reading environment. That makes TirgumAI one of the first packages to support the entire process of making a Bible, from translation to distribution.

The translation view in TirgumAI, shown with the Dutch interface (not yet publicly available)

Less time

A Bible easily runs to more than a thousand pages. The software typesets the whole text in one pass and automatically suggests fixes when problems arise.

Lower cost

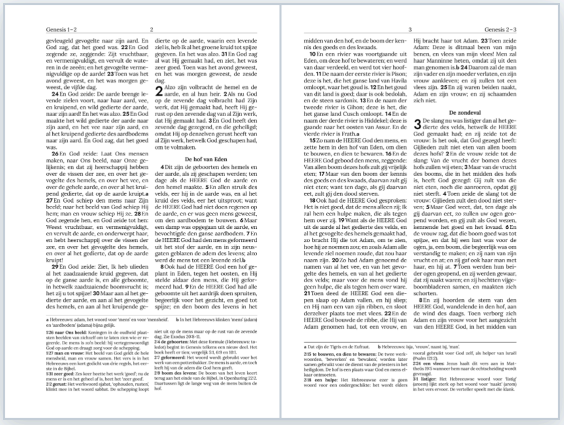

Even a small print run or a first edition becomes feasible. Publishers without experience benefit from ready-made templates.

No frustration

No shifting verses or misplaced footnotes. Every proof is typeset in the same way, so what was right stays right.

EXAMPLES FROM THE SOFTWARE

Choose a template, or have your own design made

TEMPLATE

Study Bible

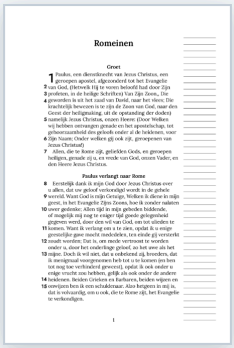

Two columns, with footnotes and study notes at the bottom of every page. The software automatically sets:

- ✓ headings, chapter and verse numbers
- ✓ footnotes and cross-references
- ✓ study notes with the right verse
- ✓ balanced columns, with hyphenation
- ✓ bleed and crop marks for the printer

Pew Bible

Template: two columns, cross-references and thumb tabs in the margin.

Journaling Bible

Template: one column, verse numbers in the margin and ruled lines for notes.

Custom design

Based on a customer's sample page, with its own page size, typeface, running head and footnote style.

All templates: Reader's Bible · Pocket Bible · Large print · Pew Bible · Children's Bible · Study Bible · Pastor's Bible · Application Bible · Journaling Bible

1 Send us your text

From Paratext, as USFM or USX, or as a Scripture Burrito.

2 Choose the layout

A ready-made template or a custom design.

3 Review the proof

Download it as a PDF, with layout problems detected for you.

4 Drukcase prints

The print file goes to press and Drukcase takes care of the rest.

DRUKCASE

Drukcase is one of the fastest-growing print brokers in Europe and a specialist in Bibles. It drives innovation with products such as the Stone Paper Bible.
